An Important Reminder
From Boss Louse™

☐ Check this list before recommending treatments for head lice and remember that both the person being treated and the person applying treatment are at risk.

☐ Has the child already been treated for head lice with chemicals/pesticides for this…or a previous infestation?

☐ Has the child's home environment or bedding been treated with a lice spray?

☐ Is the child suffering from or receiving treatment for AIDS, cancer, epilepsy, asthma, allergies or any other illness?

☐ Is the child currently or recently on medication?

☐ Is the mother/caregiver pregnant or nursing or vulnerable in other ways?

☐ Is there chronic exposure to other pesticides in the home or school environment such as flea bombs or monthly exterminator services?

If you answer Yes to even one of these questions, a non-chemical approach is the best choice.

Head lice shampoos and lotions are not to be used repeatedly, in conjunction with, or as a follow-up to other chemical formulations.

The National Pediculosis Association’s®
LiceMeister®
Head Lice & Nit Removal Kit

The Non-Chemical Approach

Routine screening, early detection and thorough removal are all part of the NPA’s public health approach to protecting kids and keeping them in school lice and nit free!

Kit Contains: LiceMeister® Comb (also sold separately), Instructional video in English & Spanish, Critter Card®, Combining cape, Detangling comb, Hair-separating clips, Boss Louse™ stickers, LiceMeister® Comb cleaning tools, NPA's 10 tips for head lice and nit removal
